LEA Conference Call
November 12, 2019

Agenda Items

1. **RMTS – Day to Day**

   Coreen stated that there were some districts that felt as though their TSPs were receiving more notifications than usual. She reminded everyone that there had been a change from the 5/5 notification time period to a 1/4 notification time period. Additionally, the process is random, stating that some TSPs may receive more moments than other TSPs, but it is all part of the randomness.

   Christine Wilhite suggested that there might be a correlation between the size of the district because the smaller districts received less moments than a larger district. She felt that if the system was random, this would not be the case.

   Coreen encouraged anyone who had concerns to notify us so that we could question PCG if necessary.

2. **SPA 15-021 Update**

   Coreen stated that we were advised by DHCS that they had submitted the redline version of the SPA 15-021 to CMS on October 30th. We will keep everyone posted on the progress.

3. **Open Discussion**

   Paula announced that she will be retiring at the end of December and encouraged anyone who hadn’t submitted their data match yet to take this opportunity to do so.

   The next call will be on January 14, 2019 at 10:00 a.m.
